

MT Software Solutions
BY MARUTI TRANSPORTATION GROUP

Let's connect at **Transform 2026.**

See how MT Software Solutions brings fuel, scheduling, and payroll into one command center — built for the operational realities of NEMT fleets.

NEMT providers run on the same fragmented back office as the rest of transportation: fuel cards, time clocks, scheduling spreadsheets, and payroll systems that don't talk to each other. **MT Software Solutions replaces that patchwork with a single, live command center** — giving you real-time visibility into fleet costs and labor readiness, without the manual reconciliation.

What We'll Show You On-Site

AI-Powered Scheduling

Auto-generates optimal, overtime-free driver schedules that respect coverage needs and preferences.

Automated Payroll

Scheduled hours flow straight into payroll — no manual entry, full audit trail.

Fuel & Expense Tracking

Per-transaction fuel data and centralized expense logs, budgeted by KPI.

Real-Time KPI Dashboard

On-time percentage, overtime hours, vehicle health, and labor readiness at a glance.

Employee Self-Service

Mobile portal for timeclocks, schedules, absences, and fuel receipts — no more paperwork.

Total Operational Visibility

One source of truth from the driver in the field to the executive dashboard.

Join us: NEMT Provider TopGolf Social

Hosted by Duet & Maruti at Topgolf Orlando during Transform week — free dinner, open bar, and a longest-drive contest. This is the first public look at the Maruti operations platform. Space is limited, so RSVP early.
